

MUNDUSCOIN - The Cryptocurrency of Humanity

ABSTRACT

MundusCoin is a symbolic cryptocurrency that evolves with the human population. Each time a person is born, one MUND token is created. Each time a person dies, one token is burned. This system mirrors the rhythm of life on Earth in a purely digital way.

OBJECTIVES

The project's goal is to create a currency that is universal and symbolic, where each token represents a person. It reminds us of the value of life and offers a transparent system where the token supply follows demographic changes.

TECHNICAL SPECIFICATIONS

- Blockchain: Ethereum (ERC-20 token)
- Contract: 0xA8F26e883f2A13cA63c89748eC1260551DEEdDFf
- Initial price: \$0.01 per MUND
- Fixed price mechanism via MetaMask in the initial phase to maintain price stability
- One token minted per birth, one burned per death
- Future integration with real-time oracles for global population data

TOKEN SUPPLY

- Initial supply: 8,230,000,000 tokens
- Maximum supply: 11,000,000,000 tokens
- The total supply will evolve based on demographic trends

DISTRIBUTION AND MANAGEMENT

- 65% for public sale
- 25% reserved for marketing and distribution (including future minting)
- 10% allocated to creators

Minted and burned tokens will affect the liquidity pool and total supply dynamically.

ROADMAP

Q2 2025 - Launch with MetaMask integration and fixed-price sale

Q3 2025 - Wallet integration (planned)

2026 - Real-time oracle-based population tracking
